Professional experience:

Sweet Carrot: Columbus, Oh - Line/Prep Cook, Manager, Kitchen Lead

May 2017-September 2019. Started as a line cook and held many different positions. I was also a part of the opening team for their 2nd and 3rd locations. My highest and final position was Kitchen Lead where I was in charge of the ordering of product, overseeing the daily production including scheduling and prep lists, organization of resources and ensuring the kitchen worked as efficient as possible.

Cameron Mitchell Premier Events: Columbus, Oh – Prep and Event Team Member

September 2019 – April 2020. Worked for the largest Restaurant company in Columbus, in their catering division. As part of the prep team was responsible for prepping elements of dishes and organizing for the event team. As an Event team member, I worked on site to create a remote workspace, and cook finished dishes for clients on site.

Toshiba: Durham, NC – Repair Tech

June 2021- Present. I took the time when the pandemic started to get my CompTIA A+ cert and transitioned into an electronics repair technician following a move to North Carolina. I have worked on several different commercial products including receipt printers, card readers, and cash dispensers. I also worked with Oracle to track items and ship them from our warehouse.

Skills

I have used many tools in my time in kitchens and in electronics repair and learned to be adaptable to many different situations. You have to learn how to plan as much out in advance as possible while still remaining flexible when things don't go according to your plan. Over the last year, I have sharpened my problem solving skills and am able to diagnose issues with the machines I have to work on as well as finding the solution to get them up and running. I believe I have a methodical approach that will transition well to debugging code in the future. I follow directions well and am also able to give direction when needed.

Schooling and Certifications:

The Ohio State University: 2010 – 2015, Studied Political Science and unfortunately had to put my degree on hold. Currently I am 1 semester from graduating and plan on finishing that within the year.

The Ohio State University Coding Bootcamp: Oct 2021- April 2022. I am a recent graduate of this bootcamp where I learned the basics of many different coding technologies, including, HTML, CSS, Java, the MERN stack, SQL and NoSQL and others.

CompTIA A+ - Finished in March 2021
